Shovan Banik

WEB DEVELOPER & GRADUATE ENGINEER

A thoughtful and quick learning individual, looking for an opportunity in your reputed organization which will help me deliver my best and upgrade my skills in engineering and meet the demands of the organization. So, I can completely use my ability of critical thinking, Problem-solving, development and information of Data Science, Machine Learning, Artificial Intelligence to make an important expansion to the association alongside lifting my profession. I prefer to adopt new things in allocated time frame. Always ready to accept new challenges, have ability to think out of the box and love to lead energetic team members who shares their valuable ideas and work hard to make them live.

Identification of Spoken Language using Machine Learning Approach
Project Type: Final Year Project (Academic) with Team
Publication url: https://ieeexplore.ieee.org/document/9392744
Publication Description: Identification of spoken language is the way to detect the specific language which is spoken by an anonymous speaker. We will also find out several techniques of machine learning for detecting spoken language. Our major task is to identify parameters and features from spoken language that can be used to separate languages.
